ALUMINIUM SYSTEMS

SIVAL Element

FACADE CLADDING & SCREENS · SV-EL

SIVAL Element is a new, integrated system that functions as both a shading solution and a divider for interior or exterior spaces.

THE SYSTEM

SIVAL Element is a new, integrated system that functions as both a shading solution and a divider for interior or exterior spaces. It offers the option for custom engraving on aluminum sheets in any desired design or pattern, making it suitable for a range of applications, such as a structural element for the exterior facades of buildings, offices, and hotels.

The variety of patterns meets every aesthetic preference in a wide range of colors, while also serving as interior or exterior decoration. With the addition of LED lighting, it brings a unique character to the space.

APPLICATIONS

- commercial
- residential
- interiors
- facades

Technical data per manufacturer documentation, October 2026. Performance depends on configuration and glazing.

Basic characteristics

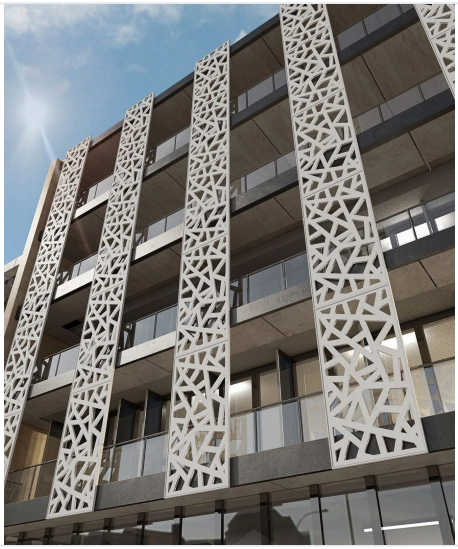

- Suitable for interior and exterior decoration.
- Possibility for custom made sheet designs (customization for pattern, shape, color) by use of laser-cutting technology.
- Suitable for shading and protecting buildings from direct sunlight.
- Ideal for coverage of perimeter sides in pergola constructions.
- Available in plethora of colors, with electrostatic coating.
- Perfect for covering building exteriors with multiple applications.
- The system is compatible with SIVAL SV-4000 Shade (shading and louvre system).
